

Community Support Program Privacy Policy

Discussion of Privacy Program
Development and Considerations

CSP Privacy Policies

- Privacy and privacy policies are critically important to CSP, our analysts, our customers, and our business
- Breaches in our privacy policies can and will be dealt with as a management priority
- CSP has privacy policy training and procedures for its analysts and teaches them to others
- **CSP resolution is limited by both technology and design**
 - Objective is 1 pixel per person and to cover as large an area as possible
 - You cannot tell who a person is, what they are wearing, or most the time what they are doing
 - Future camera enhancements allow larger coverage area to observe more crime not higher resolution
- **Investigations are tied directly to a reported crime investigation**
 - CSP analysts find a reported crime in the imagery then track cars and people who are involved or are likely witnesses to the crime and can assist in the investigation.
 - Cars and people are only tracked over public roads and sidewalks in areas that have no expectation of privacy
 - Occasionally during investigations – Additional suspicious acting cars catch the eye of the analyst – Cars going at excessive speeds, making multiple u-turns, not stopping at red lights or stop signs. These cars are followed to determine if they are involved in a larger crime effort. If they are not they are to be deleted.

CSP Privacy Policies (Cont)

- Most CSP analysts have had DHS suitability checks and/or DoD Security clearances to provide some assurance of personal integrity.
- CSP can provide an audit trail of every location and time when an analyst looked at imagery.
 - PSS through its server process can record this information and managers can review this data to ensure that the analyst is looking at appropriate locations and times for the crime they are investigating. This data can show every place and time the analyst looked. Management can pull this data when needed.
- CSP provides secure storage and management of the collected data. Sensitive data analyzed data can be secured in classified storage safes.
- All computers are password protected and firewalled keeping non-authorized users from the data.
- CSP has invited outside observers to oversee activities and ensure compliance
- Privacy Policies are tailored to the supported community through City leadership, supported organization input and public input.
- Finalized privacy policy is placed on contract to ensure compliance by both CSP and our supported organizations

Previously Expressed Privacy Concerns

- **Police Privacy Policies need further clarification and refinement** –
City Council Statement April 2013
- **Future cameras will be better and be able to identify people** – Jay
Stanley National ACLU
- **Looking people in their back yards / private areas** – Joel Pruce
 - Auditable analyst viewing locations
- **Focusing support only on minority areas** – Ellis Jacobs AL Jazzera Interview
- **Watching people from (Occupy Dayton) Protests** –
- **Jobs not from Dayton community** – Mr Forward NAACP

Previously Expressed Privacy Concerns

- **Police Privacy policies need further clarification and refinement –**
City Council Statement April 2013
- **Future cameras will be better and be able to identify people –** Jay Stanley National ACLU

Privacy Policy Development Program

- Dayton City Leadership
- Dayton Police Department
- National ACLU
- State Ohio ACLU
- Privacy Conference presentation and feedback
- Multiple Local Community Groups
- Community Feedback
- International Association of Chiefs of Police
- Airborne Law Enforcement Association
- AUVSI UAV Privacy Lawyers

**All Privacy Policies are adapted to a specific community
through community input within a city**

Sample Draft Police Department **WIDE AREA AERIAL SURVEILLANCE POLICY STATEMENT**

The XXX Police Department utilizes Wide-Area Aerial Surveillance for the purpose of creating a safer environment for all those who live, work and visit the city of XXX. This policy explains the purpose of the use of this technology and provides guidelines for the operation and for the storage of captured images.

DEFINITIONS

Wide-Area Aerial Surveillance- Wide-Area Aerial Surveillance Sensors is an optical camera assembly that can provide continuous, second-by-second video monitoring of a city-sized area via a manned small fixed wing aircraft platform.

Part 1 Crimes - The Federal Bureau of Investigation (FBI) designates certain crimes as Part I or index offenses because it considers them to be the major crimes plaguing society in the United States: Murder, Rape, Robbery, Aggravated assault, Burglary, Larceny-theft, Motor vehicle theft, and Arson.

Major Events – For the purposes of this operating policy, major events will be interpreted as any event where a large gathering of individuals may congregate and there is illegal and/or dangerous activity.

Weather Emergencies – Large scale damage or power outages due to weather related events.

Natural Disaster Response – Coordination of emergency services to aid the populace in the event of a natural disaster.

Large Scale Disturbances – Rioting, civil unrest, violent strikes, etc.

Tactical Operations – Tactical operations include SWAT call outs, active shooter situations, Hostage Team call outs, maintenance of order, etc.

Illegal Dumping – Large scale disposal of waste in public right-of-way.

Sample Draft Police Department **WIDE AREA AERIAL SURVEILLANCE POLICY STATEMENT**

I. Purpose

Wide-Area Aerial Surveillance (WAAS) can be used for general deterrence of targeted crimes; disrupting identified crime patterns; safeguarding against potential threats to the public; management of emergency response situations during natural and man-made disasters; and for support of tactical operations.

II. Wide-Area Aerial Surveillance

- The use of wide-area aerial surveillance (WAAS) will only be utilized to view areas of public right-of-way or public view.
- The current system has the ability to operate uninterrupted for five hours without having to make a stop for fuel.
- The sensor technology has the capability of viewing up to a 25 square mile area depending upon altitude
- The images captured by the sensor have the ability to be viewed nearly in real-time utilizing a down-link system.
- While images cannot identify specific persons, they can provide significant leads to investigators (See appendix A).
- Due to the cost to operate WAAS, this technology will only be deployed for the following reasons:
 - To disrupt identified Part I crime patterns.
 - To monitor major events,
 - To assist during weather emergencies or natural disaster response.
 - To monitor large scale disturbances.
 - To support tactical operations.
 - To monitor for illegal dumping
- During active WAAS operations dispatch information, to include citizen generated calls for service, will be monitored and evaluated to see if the use of this technology would assist in the apprehension or case solvability of an active incident.

Sample Draft Police Department

WIDE AREA AERIAL SURVEILLANCE POLICY STATEMENT

III. Training

- Personnel involved directly with the use of WAAS technology shall be appropriately trained and supervised.
- Training shall include the review of this policy.

IV. Prohibited Activity

- The use of WAAS will be conducted in a professional, ethical and legal manner.
- WAAS will not be used to invade the privacy of individuals, to look into private areas or areas where the reasonable expectation of privacy exists.
- All reasonable efforts will be taken to protect these rights.
- WAAS technology shall not be used to track individuals arbitrarily or based on race, gender, ethnicity, sexual orientation, disability or other classifications protected by law.
- Under no circumstances will aerial surveillance be used for the purpose of tracking persons lawfully exercising their rights to protest or assemble.

Previously Expressed Privacy Concerns

- Police Privacy policies need further clarification and refinement –
City Council Statement April 2013
- Future cameras will be better and be able to identify people – Jay
Stanley National ACLU
- Looking people in their back yards / private areas – Joel Pruce
 - Auditable analyst viewing locations
- Focusing support only on minority areas – Ellis Jacobs AL Jazzera Interview
- Watching people from (Occupy Dayton) Protests –
- Jobs not from Dayton community – Mr Forward NAACP

Our Resolution Objectives Are Not To

- Identify vehicles specific type of vehicle
 - 6 inch resolution
- Read License Plates
 - <3 cm resolution - wrong look angle
- Identify people
 - <1 cm resolution – Wrong look angle – top of head
- Determine if someone is armed
 - 2 cm resolution
- If I had more pixels would want to cover more area and see more crimes, track more criminal to final location

Our Resolution Objectives

- Be able to track humans from crime scenes to vehicles
- Be able to track vehicles from crime scenes to place of origin and place of destination
- Maximize coverage area
 - Maximizes observed crime

Coverage Area

Resolution and Area 1 Square Mile

PSS Proprietary Information

Objective is to watch as large an area as possible while still being able to solve crime

Previously Expressed Privacy Concerns

- Police Privacy policies need further clarification and refinement –
City Council Statement April 2013
- Future cameras will be better and be able to identify people – Jay
Stanley National ACLU
- Looking people in their back yards / private areas - Joel Pruce
– Auditable analyst viewing locations
- Focusing support only on minority areas – Ellis Jacobs AL Jazzera Interview
- Watching people from (Occupy Dayton) protests –
- Jobs not from Dayton community – Mr Forward NAACP

PSS Analyst Training

- 80 hours of hands on analysis training
- Training Formalized as Community College Courses
- System Introduction
- Privacy Policies and Procedures
- System Uses and Limitations
- Tracking
- Investigation Process
- Intel process
- Criminal TTPs (What they typically do)
- Integration of sources
- Reporting results
- Leading teams

Reviewable Viewed Areas and Tracks

- Analysts support investigation of reported crimes
 - Analysts track people and vehicles in the proximity of reported crimes. (Potential suspects and witnesses)
 - Analysts are not allowed to view areas or track vehicles that are not in support of investigations
 - Tracks are identified by in investigation supported and person tracking
- Recorded viewed location by analysts
 - Images are served from central servers by requested location and time
 - Lat, Lon, time, and time of requested images from server by analyst
- Viewed areas are reviewable by management and others
 - Allows verification of areas looked at, time, and by whom
 - Reviewable by others to verify supported areas

Previously Expressed Privacy Concerns

- Privacy policies need further clarification and refinement – City Council Statement April 2013
- Future cameras will be better and be able to identify people – Jay Stanley National ACLU
- Looking people in their back yards / private areas – Joel Pruce
 - Auditable analyst viewing locations
- Focusing support only on minority areas – Ellis Jacobs AL Jazzera Interview
- Watching people from (Occupy Dayton) protests –
- Jobs not from Dayton community – Mr Forward NAACP

Covered Areas

- Up to 32 square miles
 - Covers multiple neighborhoods and communities at once
 - Systems does not focus on any single areas
- Where/when to support determined by Law Enforcement
 - Based on reported crimes, statistics, and crime heat maps from Dayton Police information system
 - Locations, times, and severity of crime patterns
- Working from Reported Crimes
 - Victims/Citizens have requested support by calling 911
 - If they do not call we do not know about it and can not support

Example

Dayton Crime 2012-13

Dayton Crime 2012-13
